CYBER SAFETY CONSULTING

Practical Cyber Safety Education for Schools, Families & Organizations

Since 2010, Cyber Safety Consulting has helped students, parents, educators, schools and organizations navigate an increasingly complex digital world. Our practical, age-appropriate education addresses today's online risks while helping families, schools and organizations build safer, healthier technology habits.

OUR SERVICES

Student, Parent & Educator Presentations

Engaging, age-appropriate cyber safety education for schools and communities. Presentations provide practical guidance participants can understand and use immediately.

CASE Cyber Safety Curriculum

A structured curriculum that helps schools build ongoing, age-appropriate cyber safety education into their learning environment and reinforce safer digital decision-making.

Private Family Consulting

Individual guidance for families facing technology concerns, online risks, difficult situations or the need to establish healthier, safer digital habits at home.

Corporate & Organization Programs

Cyber safety education for employees and organizations, including programs designed as an employee benefit for parents and caregivers navigating today's online world.

TOPICS WE ADDRESS

Social Media	**Cyberbullying**	**Online Predators**	**Sextortion**	**Gaming**	**AI & Deepfakes**
Scams & Fraud	**Privacy & Overexposure**	**Digital Reputation**	**Screen Time**	**Healthy Technology Habits**	**Parent-Child Communication**

TESTIMONIALS

We have used Cyber Safety Consulting for both parent and student presentations. It is very impressive that the presentations are so group/age specific and detailed. In addition, our school has a 1:1 tablet program for the 6th-8th grade students. I have used CSC to test the safety and filtering of our tablets. CSC returned with suggestions to lock things down even more. We will certainly continue our relationship with Cyber Safety Consulting and look forward to working with them in the future. Thanks so much!

Bill Reece St Petronille School

"Thank you for a wonderful presentation! I was very happy to see how engaged the students were and how you drew them into stories that were relevant to them. My biggest take away was that these children are getting machines (phones/Internet etc.) that they are not ready for – it is like they have been given keys to a sports car but should be learning how to ride a bike."

Paul Saunders Head of Warren Walker Middle School, CA

CYBER SAFETY EDUCATION SINCE 2010

Programs can be customized for your audience and today's online concerns.
